## Component Update Notification

**Part Number:** AM800600M series

**Product Description:** 8.4" 800 x 600 TFT display module

**Changed items:** FPC modification and glass production plant

**Issue Date:** 2013/07/02

Due to the full occupancy at the LCD vendor's plant and the tight material supplies, Ampire would like to inform our customers of AM800600M series the following adjustments. The production will move to a different plant and the FPC will come with shielding. The cell glass and IC will remain the same. Ampire is able to approve the new model and implement to all the current products. If the customers find it necessary, they can start testing and approving updated models. Ampire will assist you in the approval process to ensure the smoothest transition possible. For new designs, please inquire your sales contact to sample new models as well.

As soon as all the open POs are produced and shipped, all the new productions are going to use the new supplies. All part numbers will remain the same. Please see the list below for the affected models. Ampire apologize for all the inconveniences and thank you for your cooperation. If you have any further questions, please contact your Ampire sales representatives ASAP.

List of models	
AM800600M1 series	AM800600M6 series
